

The Colour of Hope

What is hope? a wish, a desire or positive thought.

What colour is it? That depends on what we are hoping for.

Colours can evoke different feelings or emotions

RED if you are hoping for love and warmth

ORANGE for happiness and excitement

YELLOW brightness and sunshine

GREEN peace and serenity

BLUE Clarity and freshness

INDIGO & VIOLET the purple colour of riches and royalty

But life is a variety of hopes, dreams and emotions

So it comes together as a rainbow

The ultimate symbol of hope and promise

A beautiful moment of colour

Which as in life is not there continually

But is appreciated when it is.

So what colour is hope?

It is all the colours of the rainbow
