The Colour of Hope

(as seen with 2020-vision)

The colour of Hope is a Rainbow
     – as we've seen from the past year.

A rainbow of colour brings hope of better times
     … gives thanks … and helps overcome fear.

On flags, on banners, on windows,
     and even chalked on the wall

it can call for protection, for tolerance & freedom
     and equal respect for us all.

The black of the night .. the white of the stars
     and even the silver of moon

give way to the hue of a sky that is Blue
     and the Yellow of a sunny afternoon.

The colours of Red – Orange – Yellow - Green – Blue
     all the spectrum to Indigo and Violet

can guide you through the rapids of these anxious times
     with the rainbow of hope as your pilot
